PONDS & FISH
WATERFALLS
LANDSCAPING
SNOWPLOWING
LAWN CUTTING

Many of you have us open and close your pond but this service will be all season long. That means that every month, every 2 weeks, or every week we will stop by and service your pond. This is a great service at a reasonable price, we can keep that pond sparkling all year long. The pond crew carries chemicals, clamps, lights, and other pond parts in stock. We can also drop off fish food, some extra stone, or get that pond ready for a party. Local ponds within (10) miles have no extra travel fees.

Come fall we will get the net on and prepare you for the leaves. Call for more information and to get signed up. We will come out and discuss with you frequency and service level you need. Our routine call would consist of cleaning the filters, add water or drain as needed, do algae chemicals, trim the plants, fertilize every (6) weeks, pick out debris, inspect for leaks, straighten up the rocks, etc...
