Winter storage began on October 1, 2017 and will continue until next year May 1, 2018. All fish will be picked up when your pond is closed this fall. Your pond will be closed as normal, drained, and fish moved to our K & A indoor storage. At this time they will be photographed, stored, and maintained until spring of 2018. We will not be mixing fish with other customers, your fish stay together in their own tank/vat. Prices include storage, water changes, water monitoring, feeding, and consultation if needed.

Rates vary from \$95.00 - \$250.00 per tank/vat, fish loads will be decided by staff/customer input. You can be billed monthly, end of season, or next spring. Any questions on this awesome care free service please call/email the office ASAP.
